Engineering News-Record index

CONTENT

Part I—Subject Index

The index includes all articles that have appeared within the dates covered, with the exception of certain Briefs (such as Labor Briefs, Careers) and Obituaries.

The subject headings under which all articles are indexed appear in alphabetical order. Within the subject headings the entries are listed chronologically.

Many important headings are divided into subheadings, for example, BRIDGES—by states or countries; CITIES—by name; BUILDINGS—by type (churches, garages, etc.).

International coverage is shown under the letter "I." The items here listed geographically also appear under the appropriate subject headings.

Part II—Names

Part II of the index contains names of authors, personalities, and companies. Listed here are the names of people who are the subject of articles; names of authors of by-lined articles and published letters; and names of firms about which articles were written.

Individuals or firms simply mentioned in feature articles about various construction projects are seldom indexed by name. Those, on the other hand, who are listed under **Names** will usually not appear under the subject heading. For example, an article about the Smith Construction Co. appears only in the **Names** section and will not be found under the heading CONTRACTORS.

Part III—Product Manufacturers

Items that describe new materials and equipment, including Product Briefs, are indexed under this heading, by manufacturer's name.

TERMS USED

See means that all entries on the subject will be found under another heading: EXCAVATING, **see:** SOIL.

See also means that a related heading should also be checked: SEWAGE, **see also**: WATER POLLUTION.

The following abbreviations and signs are used:

RC —Reader Comment
CW —Construction Week
WO —Washington Observer
B —Brief and Around the World
e —Editorial
** —Article with several illustrations
* —Illustrated article (if asterisk precedes entry, reference is to a picture with caption only.)

ENGINEERING NEWS RECORD is published every Thursday. There are 25 or 26 issues in each half-yearly volume, covering January to June and July to December, starting with vol. 78 in 1917, when ENGINEERING NEWS and ENGINEERING RECORD joined forces under the present title.

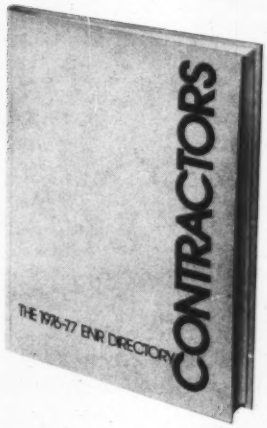
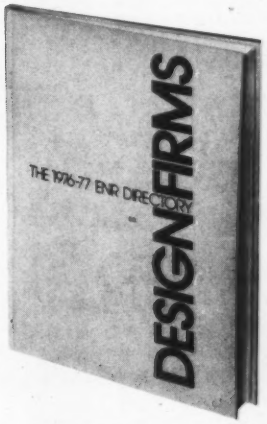
INVALUABLE INFORMATION FOR EVERYONE INVOLVED WITH CONSTRUCTION



The ENR 1976-77
Directory of Contractors

If you buy construction services, or sell to construction design firms or contractors, the new editions of Engineering News-Record's directories are essential reference sources. The principal content consists of two page brochure-type information about scores of participating design firms and contractors. Included are such data as the type of projects they design or construct, their client lists, experience, range of services, list of past and present projects, headquarters and branch office locations, subsidiary and affiliated firms, key personnel, etc. Each directory contains alphabetical indexes of participating firms, cross-indexed by type of company, type of jobs handled and office locations.

• The ENR Directories also feature lists of the largest U.S. design firms and contractors, including both participating and non-participating firms.



The ENR 1976-77
Directory of Design Firms

• The DIRECTORY of DESIGN FIRMS will list the 444 largest U.S. design firms by dollar volume of billing; the 56 largest design-construct firms by total project cost and design only work; and an alphabetical listing (with addresses) of design only and design-construct companies.

• The DIRECTORY of CONTRACTOR FIRMS will list the 400 largest U.S. contractors by dollar volume and alphabetically with addresses.

Copies of each Directory are available at $9.95 each. They will repay your investment the first time you use them.
